

AQUA RECYCLE[®]

Clean water. Clean profit.SM

ERS

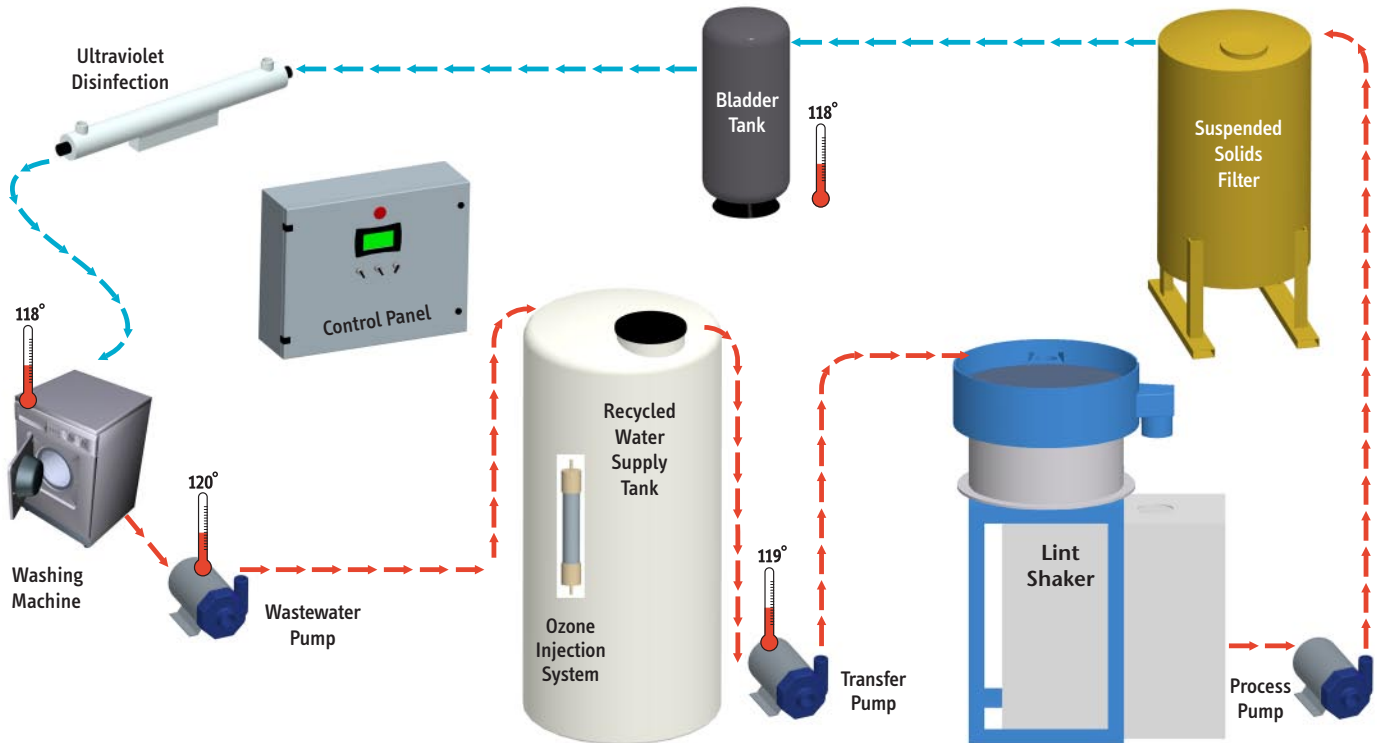

- ERS or Energy Reduction System is designed to provide recycled water to the initial flush and wash zones only. City water rinses are required in this process
- Targets laundry operations with lower water and sewer rates but high energy costs
- Reduces city water usage up to 50% and energy up to 50%
- Fully upgradeable and expandable – as your operation grows so does the ERS
- System sizes are: Small (25GPM) Medium (50GPM) Large (100GPM) and XLARGE (200 GPM)

ERS

Simple Operation

- Wastewater from the washers are pumped to our lint removal vibration system or, for smaller operations, pressurized bag filters
- A centrifugal pump sends the filtered water through our suspended solids filter and sending the recycled water directly to the washers as the hot water supply. There is always city water rinses in this application
- UV and Ozone Disinfection System provide a dual assault on bacteria and viruses before the recycled water goes back into the washing process. The AquaRecycle® AquaSmart™ system monitors water quality and chemistry to insure only the best quality water comes back to the laundry operation
