

# AQUARECYCLE<sup>®</sup>

Clean water. Clean profit.<sup>SM</sup>

# PREMIUM

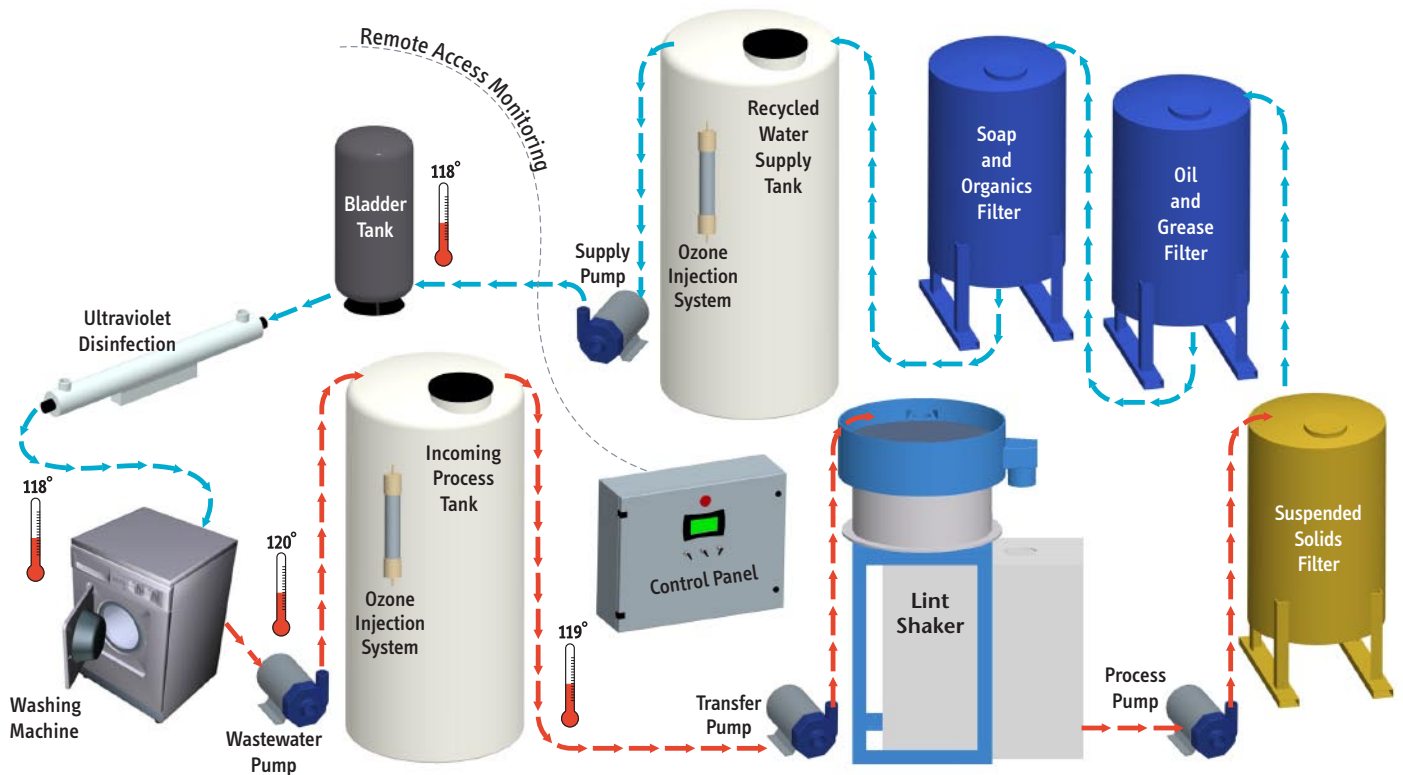

- This is our original Patented AquaRecycle<sup>®</sup> process, designed to maximize water and energy savings
- Targets all kinds of laundry operations from hospitality to healthcare operations, both On Premise Laundry (OPL) and centralized commercial laundries
- Fully upgradeable and expandable – as your operation grows, so does the premium recycling unit
- Reduces city water usage by 80% and energy up to 50%
- System sizes range from 10GPM to 300GPM

# PREMIUM

## Simple Operation

- Wastewater from the washers are pumped to a wastewater tank (IPT) and then to our lint removal vibration system for removal of all large solids in the process water
- A centrifugal pump sends the filtered water through our pressure filters, removing the suspended solids, oil and grease, soaps and organics, and other contaminants and sending the recycled water to a recycled water tank. Then another supply pump sends high volume flow of recycled water to the washing machines as both hot and cold water supply to the washers
- UV and Ozone Disinfection System provide a dual assault on bacteria and viruses before the recycled water goes back into the washing process. The AquaRecycle® AquaSmart™ system monitors water quality and chemistry to insure only the best quality water comes back to the laundry operation
